---

## SKILLS

JavaScript | TypeScript | RxJS | NodeJS(Express)  
React | Angular | Redux | MobX | NgRx  
Micro frontends (Nx) | Webpack | Vite | Git | Figma  
HTML | SCSS | Tailwind | Bootstrap | Material UI | Angular Material

## EXPERIENCE

### **Wärtsilä, Belgrade (Serbia)** – *Frontend Developer (Middle)*

JANUARY 2021 – PRESENT

- Developed from scratch the UI for a maritime application that was honored with the **Port & Terminal Digital Technology Award**, showcasing digital solutions designed to reduce CO2 emissions and pollution in port areas. This innovative application is now deployed in various **ports worldwide**.
- Utilized modern technologies including **PixiJS, Canvas**, along with **map libraries (Leaflet, Mapbox)** to develop a marine digital solution, managing **extensive real-time data**.
- Supported the adoption of **Micro Frontends architecture using Nx**, promoting a modular development approach and seamless microservices integration, enhancing project scalability.
- Worked closely with designers, brainstorming and implementing complex UIs. Praised for design thinking by the creative team and contributed actively to the internal frontend design community.

### **Freelance Development, Remote** – *Frontend Developer*

JANUARY 2020 – DECEMBER 2020

- Actively collaborated with UX/UI designers, contributing **'design thinking'** insights that bridged technical development with creative design concepts.
- Developed intuitive and user-friendly UI for various digital marketing projects.
- Recognized for a proactive approach in brainstorming sessions with design teams, frequently sought after for opinions on enhancing user experience and visual appeal.

## EDUCATION

**University of Economics, Saint-Petersburg, Russia** – *Bachelor of Media (2018)*
